

of first ascents and accidents. It is very carelessly compiled, and the author, giving no references, appears to prefer plagiarism or error to acknowledgements. Mistakes and misprints exist without number. We will content ourselves with quoting a few.

Mr. Cockin was *not* an *Alleingänger* when he lost his life so unfortunately on the Weisshorn in 1900. His companions were two well-known members of the Alpine Club, and it was in a brave attempt to fetch help for them that Cockin fell (p. 272).

In the Matterhorn accident of 1865, 'four' bodies were *not* seen by eye-witnesses viewing the final resting-place of the victims (p. 261). The body of Lord Francis Douglas was never found, as the author himself points out on the following page.

The 'Borekhardt' accident was very different from that related; while the 'Chester' accident appears to be a belated—and clumsy—attempt to whitewash the Zermatt guides concerned.

As for 'Die Entwicklung Zermatt's' and its *Gasthöfe*, we will dismiss this as an advertisement which cannot but benefit the 'Seiler' hotels. The local tales at the end do not possess even esoteric interest.

The book may appeal to the vulgar, but enough—or the author will think we are taking him seriously.

THE ALPINE CLUB LIBRARY.

The following works have been added to the Library:—

Club Publications.

- Akad. Alpenclub Bern.** 22. Jahresbericht. $9 \times 5\frac{1}{2}$: pp. 32: ill. 1928
 — Nachttag z. Clubführer d. d. Engelhörner. $7\frac{1}{4} \times 4\frac{1}{2}$: pp. 20: ill. 1928
 (1a) **Akad. Alpen-er. Berlin.** 23. u. 24. Jahresbericht, 1925-7. $9\frac{1}{2} \times 6\frac{1}{4}$: pp. 47. 1927
 (1c) **Akad. Alpenver. München.** 35. Jahresb. 1926-7. $8\frac{3}{4} \times 5\frac{3}{4}$: pp. 56: plates. 1928
Akad. Skiclub München. Jahresbericht 1926-7. $9 \times 5\frac{1}{2}$: pp. 41. 1928
 In mem. Karl Gruber, with portrait.

- This diary is interesting for various mountain ascents :
- 'February 1809. I prevailed upon Mr. Mackinnon to accompany me part of the way (Sierra Nevada, Spain) which he did at 5 o'clock next morning. To ascend the mountain, we passed through woods and rocks : and—prepared with a bottle of laudanum, nails in my shoes, a hammer and stick—I too took leave of my friend and the guide at the beginning of the snow at midday, when they returned to Granada. The object of this undertaking was to explore the original formation of the mountain, as I perceived near the summit a part of the rock exposed like a small precipice. After the first three or four hours climbing through the snow, with a burning sun over my head

—which I kept cool by a piece of ice in my mouth—with feet and body almost frozen from the repeated falls in the snow—sometimes ten or fifteen feet where the footing was false—the frozen region gradually became harder, and occasionally would bear one foot, sometimes both—until about the fifth hour, when it was perfectly hard and firm ice. Now it became steeper and more abrupt as I crawled up a ridge of the mountain chain, breaking holes with the hammer at long steps from each other for my feet. Had it not been for the opium, which I took every ten or fifteen minutes, I might have been hurled down the steep upon the ice with dreadful velocity for many miles—as it appeared—into the bosom of the earth, or into a valley of eternal winter. Still resolved to proceed, I pushed forward as the evening advanced, knowing that it would be moonlight: but clouds collected, and with difficulty I could just distinguish by my watch that it was 9 o'clock when I attained the foot of the wished-for granite precipice. Here—within one hundred feet of the highest part of this chain of mountains—I rested and took more laudanum. Now the most awful hours I ever witnessed began. Darkness prevailed below, and thunder shook the rocks. There was some light above from an obscured moon. . . . I was kept there by the lightning until 2 o'clock in the morning, and, on descending, narrowly escaped being shot by some guerrillas. . . . At 11 o'clock in the morning I breakfasted in Granada—bringing back a piece of granite and an empty bottle of laudanum.

'September 1809. On expressing a desire to ascend Olympus, the Governor ordered ten of his horse-soldiers to accompany us as a security against the banditti. In five hours we came to the beginning of the snowy region, and the guides would not proceed. We were gratified with very fine views.

'October. We were nine hours in ascending (Mount Ida, Troy) and then did not attain the summit by two hours more—in consequence of the snow. The view was the grandest picture we ever witnessed.'

D'Egville, A. H. Modern ski-ing. $8\frac{1}{2} \times 5\frac{1}{2}$: pp. xvi, 173: ill. London, Arnold, 1927. 12s. 6d.

De Espana, Arnaldo. Amenidas. Serie de doce charlas emitadas en Madrid desde los Estudios de Union-Radio. $7\frac{1}{2} \times 5$: pp. (ix), 197. Madrid, 1928. Contains *inter alia*: De re alpina; Participacion espanola en los Alpes.

Desmots, Oreste. Les Dolomites. Ouvrage orné de 8 aquarelles de Jung-reuthmayer et de 209 héliogravures. $13 \times 9\frac{1}{2}$: pp. 112: 217 plates. Paris, Alpina, 1928

The aquarelles are rough, but the other plates are excellent. A finely produced book.

Elsner, Eleanor. The romance of the Basque country and the Pyrenees. $8\frac{3}{4} \times 5\frac{1}{2}$: pp. xi, 319: plates. London, Jenkins (1927). 10s. 6d.

Faes, Henry, et P. L. Mercanton. Le manuel du skieur suivi des itinéraires recommandables en Suisse occidentale. 2e éd. revue. $8\frac{1}{2} \times 5\frac{1}{2}$: pp. 112: ill. Lausanne, etc., Payot, 1925

Presented by Dr. H. Faes.
